MEETING NOTES

Recap of last meeting

Group approved 2/27 notes, and confirmed status of action items. John Vezina provided update on Fauntleroy Parking questions, agreed to follow up with appropriate elected officials regarding parking enforcement and community outreach.

Public awareness: buy tickets in advance

Group recommended amendments to draft including involving ticket sellers, adding on-board announcements, and refining ways to connect with older audiences and people who might not wish to change their behavior. Group approved plan as amended and recommend it as a “quick win.”

Tollbooth quick win prototypes

WSF presented findings of employee review of prototypes. Task force reviewed common features and limitations of their prototypes. Group agreed to WSF’s proposed prototype as “quick win.” WSF commits to refining details within the task force’s recommended outline, informing the public early about potential changes, testing the prototype before summer, and reporting back to task force regarding test results, modifications and the final plan for summer.

Filling the boat and leaving on time

WSF presented analysis of the schedule impacts of holing in vessels to “fill the boat.” Analysis indicates that holding in vessels does move more cars during peak time, but results in significant capacity loss and disruption elsewhere in the schedule. The group agreed to consider WSF recommendations for minor schedule to provide more time to fill the boats, as long as recommendations don’t result in loss of service. Group further agreed that minor improvements are acceptable, even if filling every space on every vessel is not possible as a “quick win.”

Next steps

- WSF to develop draft Task Force recommendations document
- Task force to review, amend and approve “quick win” recommendations at next meeting
